	maxOccurs:	unbounded
Model	pictorialRepresentation+ , pictureCaption{0,1} , sourceDate{0,1} , pictureInformation{0,1} , bearingInformation{0,1}	

Element FeatureTypeType / sourceIndication

Namespace	http://www.iho.int/S131/2.0
Diagram	Type	sourceIndicationType
Properties	content: complex minOccurs: 0 maxOccurs: unbounded
Model	categoryOfAuthority{0,1} , countryName{0,1} , source{0,1} , sourceType{0,1} , reportedDate{0,1} , featureName*

Element FeatureTypeType / textContent

Namespace	http://www.iho.int/S131/2.0
Diagram	Type	textContentType
Properties	content: complex minOccurs: 0 maxOccurs: unbounded
Model	categoryOfText{0,1} , information* , onlineResource{0,1} , sourceIndication*

Element FeatureTypeType / permission

Namespace	http://www.iho.int/S131/2.0

Annotations	`Applicability[0..*]`
Diagram	Type	permissionType
Type hierarchy	• gml:ReferenceType • permissionType
Properties	content: `complex` minOccurs: `0` maxOccurs: `unbounded`
Model	PermissionType

Attributes

QName	Type	Fixed	Default	Use	
nilReason	gml:NilReasonType			optional	
owns	boolean		false	optional	
xlink:actuate	xlink:actuateType			optional	
xlink:arcrole	xlink:arcroleType			optional	
xlink:href	xlink:hrefType			optional	
xlink:role	xlink:roleType			optional	
xlink:show	xlink:showType			optional	
xlink:title	xlink:titleAttrType			optional	
xlink:type	xlink:typeType	simple		optional	

Element `permissionType / PermissionType`

Namespace	http://www.iho.int/S131/2.0

Diagram	Type	PermissionTypeType
Properties	content: complex minOccurs: 1 maxOccurs: 1
Model	categoryOfRelationship
Attributes	**QName** / **Type** / **Use** **gml:id** / ID / optional The attribute gml:id supports provision of a handle for the XML element representing a GML Object. Its use is mandatory for all GML objects. It is of XML type ID, so is constrained to be unique in the XML document within which it occurs.

Element `PermissionTypeType / categoryOfRelationship`

Namespace	http://www.iho.int/S131/2.0
Diagram	Type	categoryOfRelationshipType
Type hierarchy	• xs:string • categoryOfRelationshipLabel • categoryOfRelationshipType
Properties	content: complex minOccurs: 1 maxOccurs: 1
Attributes	**QName** / **Type** / **Use** **code** / categoryOfRelationshipCode / required

Element `FeatureTypeType / theRxN`

Namespace	http://www.iho.int/S131/2.0

Annotations	`AbstractRxN[0..*]`
Diagram	Type	gml:ReferenceType
Properties	content: `complex` minOccurs: `0` maxOccurs: `unbounded`
Model	

Attributes

Simple Type(s)

Simple Type codelistTypeType

Namespace	http://www.iho.int/S131/2.0
Annotations	An S-100 codelist.
Diagram	Type	restriction of xs:string
Facets	enumeration openEnumeration Open enumeration enumeration openDictionary Open dictionary enumeration closedDictionary Closed Dictionary
Used by	Attributes actionOrActivityType/@codelistType, categoryOfRxNType/@codelistType, categoryOfVesselType/@codelistType, securitySafetyEmergencyServiceType/@codelistType, transportConnectionType/@codelistType

Simple Type extraLabelType

Namespace	http://www.iho.int/S131/2.0
Annotations	Label type for labels of extra values in open enumeration codelists. Accepts any non-empty string beginning with an alphanumeric character and not ending in whitespace. Introduced for the new S-100 5.0 GML encoding.
Diagram	Type	restriction of xs:string
Facets	pattern ([a-zA-Z0-9]|[a-zA-Z0-9].*\S)

Simple Type extraValueType

Namespace	http://www.iho.int/S131/2.0
Annotations	Value type for the extra values in open enumeration codelists. Currently just an alphanumeric string, but should perphaps conform to S-100 3-6.7.

Diagram		
Type	restriction of xs:string	
Facets	pattern	`[a-zA-Z0-9]+( [a-zA-Z0-9]+)*`
Used by	Attributes	actionOrActivityType/@otherValue, categoryOfRxNType/@otherValue, categoryOfVesselType/@otherValue, securitySafetyEmergencyServiceType/@otherValue, transportConnectionType/@otherValue

Simple Type `administrativeDivisionType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`A generic term for an administrative region within a country at a level below that of the sovereign state.`
Diagram	Type	xs:string
Used by	Element contactAddressType/administrativeDivision

Simple Type `applicableLoadLineZoneType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`The load line zone in which the port is located. Defined by the International Convention on Load Lines.`
Diagram	Type	xs:string
Used by	Element HarbourAreaAdministrativeType/applicableLoadLineZone

Simple Type `applicationProfileType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Name of an application profile that can be used with the online resource.`
Diagram	Type	xs:string
Used by	Element onlineResourceType/applicationProfile

Simple Type `approachDescriptionType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Description of the approach to a location.`
Diagram	Type	xs:string
Used by	Element EntranceType/approachDescription

Simple Type `associatedFeatureNameType`

Namespace	http://www.iho.int/S131/2.0
Annotations	The name of an associated feature.
Diagram	Type	xs:string
Used by	Element EntranceType/associatedFeatureName

Simple Type `availableBerthingLengthType`

Namespace	http://www.iho.int/S131/2.0
Annotations	The length of a berth or dock which is available for use.
Diagram	Type	restriction of xs:decimal
Facets	maxInclusive 10000.0 minInclusive 0.0
Used by	Element BerthType/availableBerthingLength

Simple Type `berthingAssistanceLabel`

Namespace	http://www.iho.int/S131/2.0
Annotations	Classification of assistance for mooring or anchoring operations.
Diagram	Type	restriction of xs:string
Facets	enumeration Berthing Information — 1: Information about assistance or arrangements for a service related to berthing operations. enumeration Line Personnel — 2: Personnel specializing in the mooring and unmooring of vessels. enumeration Mooring Boat — 3: A boat which assists the securement of a vessel to a berth or mooring with ropes or anchor. enumeration Mule — 4: A locomotive for moving vessels. enumeration Tugboat — 5: A powerful small boat designed to pull or push larger ships or powerless barges. enumeration Icebreaking Ship — 6: A ship equipped to make and maintain a channel through ice.
Used by	Complex Type berthingAssistanceType

Simple Type `berthingAssistanceCode`

Namespace	http://www.iho.int/S131/2.0
Annotations	Classification of assistance for mooring or anchoring operations.
Diagram	Type	restriction of xs:integer
Facets	enumeration 1 — Information about assistance or arrangements for a service related to berthing operations.

	enumeration	2	Personnel specializing in the mooring and unmooring of vessels.
	enumeration	3	A boat which assists the securement of a vessel to a berth or mooring with ropes or anchor.
	enumeration	4	A locomotive for moving vessels.
	enumeration	5	A powerful small boat designed to pull or push larger ships or powerless barges.

	enumeration	11	Liquids or gases that are transported in bulk and carried unpackaged.
	enumeration	12	Cargo transported in refrigerated containers, generally perishable commodities which require temperature-controlled transportation, such as fruit, meat, fish, vegetables, dairy products and other foods.
	enumeration	13	Wheeled cargo, such as cars, busses, trucks, agricultural vehicles and cranes, that are driven on and off the ship on their own wheels or using a platform vehicle, such as a self-propelled modular transporter.

	enumeration	14	Project cargo is a term used to broadly describe the national or international transportation of large, heavy, high value, or critical (to the project they are intended for) pieces of equipment. Also commonly referred to as heavy lift, this includes shipments made of various components which need disassembly for shipment and reassembly after delivery.
	enumeration	15	Goods that are stowed on board ship in individually counted units, and not in intermodal containers nor in bulk as with oil or grain.

Facets	enumeration	1	A terminal for roll-on roll-off ferries.
	enumeration	3	A terminal for passenger and vehicle ferries.
	enumeration	4	A harbour with facilities for fishing boats.
	enumeration	5	A harbour facility for small boats, yachts, etc., where supplies, repairs, and various services are available.
	enumeration	6	A centre of operations for naval vessels.
	enumeration	7	A terminal for the bulk handling of liquid cargoes.
	enumeration	8	A terminal for the loading and unloading of passengers.
	enumeration	9	A place where ships are built or repaired.
	enumeration	10	A terminal with facilities to load/unload or store shipping containers.
	enumeration	11	A terminal for the handling of bulk materials such as iron ore, coal, etc.
	enumeration	12	A platform powered by synchronous electric motors (for example syncrolift) used to lift vessels (larger than boats) in and out of the water.
	enumeration	13	A wheeled vehicle designed to lift and carry containers or vessels within its own framework. It is used for moving, and sometimes stacking, shipping containers and vessels.
	enumeration	14	A harbour within which the floating equipment (dredges, tugs ...) of harbour services are stationed.
	enumeration	15	The services of a person who directs the movements of a vessel through pilot waters, usually a person who has demonstrated extensive knowledge of channels, aids to navigation,

			dangers to navigation, etc., in a particular area and is licensed for that area, are available.
	enumeration	16	A place where mechanical services or repairs can be undertaken to engines or other vessel equipment.
	enumeration	17	A medical control center located in an isolated spot ashore where patients with contagious diseases from vessel in quarantine are taken.

Simple Type thicknessOfIceCapabilityType

Namespace	http://www.iho.int/S131/2.0	
Annotations	The thickness of ice that the ship can safely transit.	
Diagram		
Type	restriction of xs:integer	
Facets	minExclusive	0
Used by	Element	ApplicabilityType/thicknessOfIceCapability

Simple Type timeOfDayEndType

Namespace	http://www.iho.int/S131/2.0	
Annotations	The time corresponding to the end of an active period.	
Diagram		
Type	xs:time	
Used by	Element	timeIntervalsByDayOfWeekType/timeOfDayEnd

Simple Type timeOfDayStartType

Namespace	http://www.iho.int/S131/2.0	
Annotations	The time corresponding to the start of an active period.	
Diagram		
Type	xs:time	
Used by	Element	timeIntervalsByDayOfWeekType/timeOfDayStart

Simple Type tugInformationType

Namespace	http://www.iho.int/S131/2.0	
Annotations	Textual description of the types and capacities of available tugs.	
Diagram		

Type	xs:string	
Used by	Element	AvailablePortServicesType/tugInformation

Simple Type `uNLocationCodeType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Used to encode the UN Location Code (http://www.unece.org/cefact/locode/service/location.html) or - in Europe - the Inland Ship Reporting Standard (ISRS) Code.`
Diagram	Type	xs:string
Used by	Elements: BerthType/uNLocationCode, HarbourAreaAdministrativeType/uNLocationCode, TerminalType/uNLocationCode

Simple Type `uncertaintyFixedType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`The best estimate of the fixed horizontal or vertical accuracy component for positions, depths, heights, vertical distances and vertical clearances.`
Diagram	Type	xs:decimal
Used by	Elements: horizontalPositionUncertaintyType/uncertaintyFixed, verticalUncertaintyType/uncertaintyFixed

Simple Type `uncertaintyVariableFactorType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`The factor to be applied to the variable component of an uncertainty equation so as to provide the best estimate of the variable horizontal or vertical accuracy component for positions, depths, heights, vertical distances and vertical clearances.`
Diagram	Type	xs:decimal
Used by	Elements: horizontalPositionUncertaintyType/uncertaintyVariableFactor, verticalUncertaintyType/uncertaintyVariableFactor

Simple Type `verticalClearanceValueType`

Namespace	http://www.iho.int/S131/2.0	
Annotations	`The vertical clearance measured from the horizontal plane towards the feature overhead.`	
Diagram		
Type	restriction of xs:decimal	
Facets	maxInclusive	`100.0`
	minInclusive	`0.1`

Used by	Elements	DryDockType/verticalClearanceValue, GridironType/verticalClearanceValue, ShipLiftType/verticalClearanceValue

Simple Type `verticalDatumLabel`

Namespace	http://www.iho.int/S131/2.0		
Annotations	The reference level used for expressing the vertical measurements of points on the earth's surface. Also called datum level, reference plane, levelling datum, datum for sounding reduction, datum for heights.		
Diagram			
Type	restriction of xs:string		
Facets	enumeration	Mean Low Water Springs	1: The average height of the low waters of spring tides. This level is used as a tidal datum in some areas. Also called spring low water.
	enumeration	Mean Lower Low Water Springs	2: The average height of lower low water springs at a place.
	enumeration	Mean Sea Level	3: The average height of the surface of the sea at a tide station for all stages of the tide over a 19-year period, usually determined from hourly height readings measured from a fixed predetermined reference level.
	enumeration	Lowest Low Water	4: An arbitrary level conforming to the lowest tide observed at a place, or some what lower.
	enumeration	Mean Low Water	5: The average height of all low waters at a place over a 19-year period.
	enumeration	Lowest Low Water Springs	6: An arbitrary level conforming to the lowest water level observed at a place at spring tides during a period of time shorter than 19 years.
	enumeration	Approximate Mean Low Water Springs	7: An arbitrary level, usually within 0.3m from that of Mean Low Water Springs (MLWS).
	enumeration	Indian Spring Low Water	8: An arbitrary tidal datum approximating the level of the mean of the lower low water at spring tides. It was first used in waters surrounding India.
	enumeration	Low Water Springs	9: An arbitrary level, approximating that of mean low water springs (MLWS).
	enumeration	Approximate Lowest Astronomical Tide	10: An arbitrary level, usually within 0.3m from that of Lowest Astronomical Tide (LAT).
	enumeration	Nearly Lowest Low Water	11: An arbitrary level approximating the lowest water level observed at a place, usually equivalent to the Indian Spring Low Water (ISLW).
	enumeration	Mean Lower Low Water	12: The average height of the lower low waters at a place over a 19-year period.
	enumeration	Low Water	13: The lowest level reached at a place by the water surface in one oscillation. Also called low tide.
	enumeration	Approximate Mean Low Water	14: An arbitrary level, usually within 0.3m from that of Mean Low Water (MLW).
	enumeration	Approximate Mean Lower Low Water	15: An arbitrary level, usually within 0.3m from that of Mean Lower Low Water (MLLW).
	enumeration	Mean High Water	16: The average height of all high waters at a place over a 19-year period.
	enumeration	Mean High Water Springs	17: The average height of the high waters of spring tides. Also called spring high water.
	enumeration	High Water	18: The highest level reached at a place by the water surface in one oscillation.
	enumeration	Approximate Mean Sea Level	19: An arbitrary level, usually within 0.3m from that of Mean Sea Level (MSL).
	enumeration	High Water Springs	20: An arbitrary level, approximating that of mean high water springs (MHWS).

	enumeration	Mean Higher High Water	21: The average height of higher high waters at a place over a 19-year period.
	enumeration	Equinoctial Spring Low Water	22: The level of low water springs near the time of an equinox.
	enumeration	Lowest Astronomical Tide	23: The lowest tide level which can be predicted to occur under average meteorological conditions and under any combination of astronomical conditions.
	enumeration	Local Datum	24: An arbitrary datum defined by a local harbour authority, from which levels and tidal heights are measured by this authority.
	enumeration	International Great Lakes Datum 1985	25: A vertical reference system with its zero based on the mean water level at Rimouski/ Pointe-au-Pere, Quebec, over the period 1970 to 1988.
	enumeration	Mean Water Level	26: The average of all hourly water levels over the available period of record.
	enumeration	Lower Low Water Large Tide	27: The average of the lowest low waters, one from each of 19 years of observations.
	enumeration	Higher High Water Large Tide	28: The average of the highest high waters, one from each of 19 years of observations.
	enumeration	Nearly Highest High Water	29: An arbitrary level approximating the highest water level observed at a place, usually equivalent to the high water springs.
	enumeration	Highest Astronomical Tide	30: The highest tidal level which can be predicted to occur under average meteorological conditions and under any combination of astronomical conditions.
	enumeration	Baltic Sea Chart Datum 2000	44: The datum refers to each Baltic country's realization of the European Vertical Reference System (EVRS) with land-uplift epoch 2000, which is connected to the Normaal Amsterdams Peil (NAP).
Used by	Complex Type	verticalDatumType	

Simple Type `verticalDatumCode`

Namespace	http://www.iho.int/S131/2.0

	enumeration	25	A vertical reference system with its zero based on the mean water level at Rimouski/Pointe-au-Pere, Quebec, over the period 1970 to 1988.
	enumeration	26	The average of all hourly water levels over the available period of record.
	enumeration	27	The average of the lowest low waters, one from each of 19 years of observations.
	enumeration	28	The average of the highest high waters, one from each of 19 years of observations.
	enumeration	29	An arbitrary level approximating the highest water level observed at a place, usually equivalent to the high water springs.
	enumeration	30	The highest tidal level which can be predicted to occur under average meteorological conditions and under any combination of astronomical conditions.
	enumeration	44	The datum refers to each Baltic country's realization of the European Vertical Reference System (EVRS) with land-uplift epoch 2000, which is connected to the Normaal Amsterdams Peil (NAP).

enumeration	1	The average height of the low waters of spring tides. This level is used as a tidal datum in some areas. Also called spring low water.
enumeration	2	The average height of lower low water springs at a place.

	enumeration	3	The average height of the surface of the sea at a tide station for all stages of the tide over a 19-year period, usually determined from hourly height readings measured from a fixed predetermined reference level.
	enumeration	4	An arbitrary level conforming to the lowest tide observed at a place, or some what lower.
	enumeration	5	The average height of all low waters at a place over a 19-year period.
	enumeration	6	An arbitrary level conforming to the lowest water level observed at a place at spring tides during a period of time shorter than 19 years.
	enumeration	7	An arbitrary level, usually within 0.3m from that of Mean Low Water Springs (MLWS).
	enumeration	8	An arbitrary tidal datum approximating the level of the mean of the lower low water at spring tides. It was first used in waters surrounding India.
	enumeration	9	An arbitrary level, approximating that of mean low water springs (MLWS).
	enumeration	10	An arbitrary level, usually within 0.3m from that of Lowest Astronomical Tide (LAT).
	enumeration	11	An arbitrary level approximating the lowest water level observed at a place, usually equivalent to the Indian Spring Low Water (ISLW).
	enumeration	12	The average height of the lower low waters at a place over a 19-year period.
	enumeration	13	The lowest level reached at a place by the water surface in one oscillation. Also called low tide.
	enumeration	14	An arbitrary level, usually within 0.3m from that of Mean Low Water (MLW).
	enumeration	15	An arbitrary level, usually within 0.3m from that of Mean Lower Low Water (MLLW).
	enumeration	19	An arbitrary level, usually within 0.3m from that of Mean Sea Level (MSL).
	enumeration	22	The level of low water springs near the time of an equinox.
	enumeration	23	The lowest tide level which can be predicted to occur under average meteorological conditions and under any combination of astronomical conditions.
	enumeration	24	An arbitrary datum defined by a local harbour authority, from which levels and tidal heights are measured by this authority.
	enumeration	25	A vertical reference system with its zero based on the mean water level at Rimouski/Pointe-au-Pere, Quebec, over the period 1970 to 1988.
	enumeration	26	The average of all hourly water levels over the available period of record.

Namespace	http://www.iho.int/S131/2.0		
Annotations	Characteristics of vessels.		
Diagram			
Type	restriction of xs:string		
Facets	enumeration	Length Overall	1: The maximum length of the ship.
	enumeration	Length at Waterline	2: The ship's length measured at the waterline.
	enumeration	Breadth	3: The width or beam of the vessel.
	enumeration	Draught	4: The depth of water necessary to float a vessel fully loaded.
	enumeration	Displacement Tonnage	6: A measurement of the weight of the vessel, usually used for warships. (Merchant ships are usually measured based on the volume of cargo space; see tonnage). Displacement is expressed either in long tons of 2,240 pounds or metric

			tonnes of 1,000 kg. Since the two units are very close in size (2,240 pounds = 1,016 kg and 1,000 kg = 2,205 pounds), it is common not to distinguish between them. To preserve secrecy, nations sometimes misstate a warship's displacement.
	enumeration	Displacement Tonnage, Light	7: The weight of the ship excluding cargo, fuel, ballast, stores, passengers, and crew, but with water in the boilers to steaming level.
	enumeration	Displacement Tonnage, Loaded	8: The weight of the ship including cargo, passengers, fuel, water, stores, dunnage and such other items necessary for use on a voyage, which brings the vessel down to her load draft.
	enumeration	Deadweight Tonnage	9: The difference between displacement, light and displacement, loaded. A measure of the ship's total carrying capacity.
	enumeration	Gross Tonnage	10: The entire internal cubic capacity of the ship expressed in tons of 100 cubic feet to the ton, except certain spaces with are exempted such as: peak and other tanks for water ballast, open forecastle bridge and poop, access of hatchways, certain light and air spaces, domes of skylights, condenser, anchor gear, steering gear, wheel house, galley and cabin for passengers.
	enumeration	Net Tonnage	11: Obtained from the gross tonnage by deducting crew and navigating spaces and allowances for propulsion machinery.
	enumeration	Panama Canal/Universal Measurement System Net Tonnage	12: The Panama Canal/Universal Measurement System (PC/UMS) is based on net tonnage, modified for Panama Canal purposes. PC/UMS is based on a mathematical formula to calculate a vessel's total volume; a PC/UMS net ton is equivalent to 100 cubic feet of capacity.
	enumeration	Suez Canal Net Tonnage	13: The Suez Canal Net Tonnage (SCNT) is derived with a number of modifications from the former net register tonnage of the Moorsom System and was established by the International Commission of Constantinople in its Protocol of 18 December 1873. It is still in use, as amended by the Rules of Navigation of the Suez Canal Authority, and is registered in the Suez Canal Tonnage Certificate.

Annotations	The unit used for vessel characteristics attribute.		
Diagram			
Type	restriction of xs:string		
Facets	enumeration	Metres	1: The basic unit of length in the International System of Units (SI) system.
	enumeration	Metric Ton	3: The tonne or metric ton (U.S.), often redundantly referred to as a metric tonne, is a unit of mass equal to 1,000 kg (2,205 lb) or approximately the mass of one cubic metre of water at four degrees Celsius. It is sometimes abbreviated as mt in the United States, but this conflicts with other SI symbols. The tonne is not a unit in the International System of Units (SI), but is accepted for use with the SI. In SI units and prefixes, the tonne is a megagram (Mg). The Imperial and US customary units comparable to the tonne are both spelled ton in English, though they differ in mass. Pronunciation of tonne (the word used in the UK) and ton is usually identical, but is not too confusing unless accuracy is important as the tonne and UK long ton differ by only 1.6.
	enumeration	Ton	4: Long ton (weight ton or imperial ton) is the name for the unit called the "ton" in the avoirdupois or Imperial system of measurements, as used in the United Kingdom and several other Commonwealth countries. It has been mostly replaced by the tonne, and in the United States by the short ton. One long ton is equal to 2,240 pounds (1,016 kg) or 35 cubic feet (0.9911 m) of salt water with a density of 64 lb/ft (1.025 g/ml). It has some limited use in the United States, most commonly in measuring the displacement of ships, and was the unit prescribed for warships by the Washington Naval Treaty for example battleships were limited to a mass of 35,000 long tons (36,000 t; 39,000 ST).
	enumeration	Short Ton	5: A unit of weight equal to 2,000 pounds (907.18474 kg). In the United States it is often called simply ton without distinguishing it from the metric ton (tonne, 1,000 kilograms) or the long ton (2,240 pounds / 1,016.0469088 kilograms); rather, the other two are specifically noted. There are, however, some US applications for which unspecified tons normally means long tons (for example, Navy ships) or metric tons (world grain production figures). Both the long and short ton are defined as 20 hundredweights, but a hundredweight is 100 pounds (45.359237 kg) in the US system (short or net hundredweight) and 112 pounds (50.80234544 kg) in the Imperial system (long or gross hundredweight).
	enumeration	Gross Ton	6: Gross tonnage (GT) is a function of the volume of all ship's enclosed spaces (from keel to funnel) measured to the outside of the hull framing. There is a sliding scale factor. So GT is a kind of capacity-derived index that is used to rank a ship for purposes of determining manning, safety and other statutory requirements and is expressed simply as GT, which is a unitless entity, even though its derivation is tied to the cubic meter unit of volumetric capacity.Tonnage measurements are now governed by an IMO Convention (International Convention on Tonnage Measurement of Ships, 1969 (London-Rules)), which applies to all ships built after July 1982. In accordance with the Convention, the correct term to use now is GT, which is a function of the moulded volume of all enclosed spaces of the ship.
	enumeration	Net Ton	7: Net tonnage (NT) is based on a calculation of the volume of all cargo spaces of the ship. It indicates a vessels earning space and is

			a function of the moulded volume of all cargo spaces of the ship.
	enumeration	Suez Canal Net Tonnage	9: The Suez Canal Net Tonnage (SCNT) is derived with a number of modifications from the former net register tonnage of the Moorsom System and was established by the International Commission of Constantinople in its Protocol of 18 December 1873. It is still in use, as amended by the Rules of Navigation of the Suez Canal Authority, and is registered in the Suez Canal Tonnage Certificate.

enumeration	MARPOL Annex I Oily Bilge Water	1: The service with facility to receive oil related waste/residue of the type "Oily bilge water" as specified in MARPOL Annex I.
enumeration	MARPOL Annex I Oily Residues	2: The service with facility to receive oil related waste/residue of the type "Oily Residues (sludge)" as specified in MARPOL Annex I.
enumeration	MARPOL Annex I Oily Tank Washings	3: The service with facility to receive oil related waste/residue of the type "Oily tank washings (slops)" as specified in MARPOL Annex I.
enumeration	MARPOL Annex I Dirty Ballast Water	4: The service with facility to receive oil related waste/residue of the type "Dirty ballast water" as specified in MARPOL Annex I.
enumeration	MARPOL Annex I Scale and Sludge from Tank Cleaning	5: The service with facility to receive oil related waste/residue of the type "Scale and sludge from tank cleaning" as specified in MARPOL Annex I.
enumeration	MARPOL Annex I Other Oily Waste	6: The service with facility to receive oil related waste/residue of the type "Other" as specified in MARPOL Annex I.
enumeration	MARPOL Annex II Category X	7: The service with facility to receive chemical/Noxious liquid substances related waste/residue of the type "Category X" as specified in MARPOL Annex II.
enumeration	MARPOL Annex II Category Y	8: The service with facility to receive chemical/Noxious liquid substances related waste/residue of the type "Category Y" as specified in MARPOL Annex II.
enumeration	MARPOL Annex II Category Z	9: The service with facility to receive chemical/Noxious liquid substances related waste/residue of the type "Category Z" as specified in MARPOL Annex II.
enumeration	MARPOL Annex II Category OS	10: The service with facility to receive chemical/Noxious liquid substances related waste/residue of the type "Other substance" as specified in MARPOL Annex II.

	enumeration	MARPOL Annex IV Sewage	11: The service with facility to receive waste/residue of the type "Sewage" as specified in MARPOL Annex IV.
	enumeration	MARPOL Annex V Plastics	12: The service with facility to receive garbage related waste/residue of the type "Plastics", as specified in MARPOL Annex V
	enumeration	MARPOL Annex V Food Wastes	13: The service with facility to receive garbage related waste/residue of the type "Food wastes", as specified in MARPOL Annex V
	enumeration	MARPOL Annex V Domestic Wastes	14: The service with facility to receive garbage related waste/residue of the type "Domestic wastes", as specified in MARPOL Annex V
	enumeration	MARPOL Annex V Cooking Oil	15: The service with facility to receive garbage related waste/residue of the type "Cooking oil", as specified in MARPOL Annex V
	enumeration	MARPOL Annex V Incinerator Ashes	16: The service with facility to receive garbage related waste/residue of the type "Incinerator ashes", as specified in MARPOL Annex V
	enumeration	MARPOL Annex V Operational Wastes	17: The service with facility to receive garbage related waste/residue of the type "Operational wastes", as specified in MARPOL Annex V
	enumeration	MARPOL Annex V Animal Carcasses	18: The service with facility to receive garbage related waste/residue of the type "Animal carcasses", as specified in MARPOL Annex V
	enumeration	MARPOL Annex V Fishing Gear	19: The service with facility to receive garbage related waste/residue of the type "Fishing gear", as specified in MARPOL Annex V
	enumeration	MARPOL Annex V E-Waste	20: The service with facility to receive garbage related waste/residue of the type "E-waste", as specified in MARPOL Annex V
	enumeration	MARPOL Annex V Cargo Residues - non-HME	21: The service with facility to receive garbage related waste/residue of the type "Cargo residues not determined to be harmful to the marine environment", as specified in MARPOL Annex V
	enumeration	MARPOL Annex V Cargo Residues - HME	22: The service with facility to receive garbage related waste/residue of the type "Cargo residues harmful to the marine environment", as specified in MARPOL Annex V
	enumeration	MARPOL Annex VI Ozone-Depleting Substances	23: The service with facility to receive air pollution related waste/residue of the type "Ozone-depleting substances" as specified in MARPOL Annex VI.
	enumeration	MARPOL Annex VI Exhaust Gas-Cleaning Residues	24: The service with facility to receive air pollution related waste/residue of the type "Exhaust gas-cleaning residues" as specified in MARPOL Annex VI.

Facets	enumeration	1	A vessel which is designed for carrying general cargo, e.g. boxes, sacks.
	enumeration	2	A vessel designed to carry ISO containers.
	enumeration	3	A vessel which is designed for carrying liquid goods, for example oil or water.
	enumeration	4	A vessel which is designed for carrying bulk goods, e.g. coal, ore or grain.
	enumeration	5	A day trip or cabin vessel constructed and equipped to carry more than 12 passengers.
	enumeration	6	A vessel designed to allow road vehicles to be driven on and off; often a ferry.
	enumeration	7	A vessel designed to carry refrigerated cargo.
	enumeration	8	A vessel that is used and equipped for the fishing of living aquatic resources.
	enumeration	9	A vessel which provides a service such as a tug, anchor handler, survey or supply vessel.
	enumeration	10	A vessel designed for the conduct of military operations.
	enumeration	11	Either a tug and tow, or any combination of a tug providing propulsion to barges or vessels secured ahead or alongside.
	enumeration	12	A combination of tug(s) and non-powered tow(s).
	enumeration	13	A pleasure boat or watercraft, or an excursion vessel used for short cruises such as whale watching.
	enumeration	14	An installation which is designed to float at all times and which is normally anchored in position when deployed in the offshore gas and oil industry.
	enumeration	15	An exploration or project installation with legs which can be raised and lowered. The legs are raised when the installation is re-positioned.

			When stationary the legs are lowered to the sea floor and the working platform is raised clear of the sea surface.
	enumeration	16	A vessel designed to carry large quantities of live animals.
	enumeration	17	A vessel used in fishing for pleasure or competition.

	enumeration	Light Recreational	13: A pleasure boat or watercraft, or an excursion vessel used for short cruises such as whale watching.
	enumeration	Semi-Submersible Offshore Installation	14: An installation which is designed to float at all times and which is normally anchored in position when deployed in the offshore gas and oil industry.
	enumeration	Jack-Up Exploration or Project Installation	15: An exploration or project installation with legs which can be raised and lowered. The legs are raised when the installation is re-positioned. When stationary the legs are lowered to the sea floor and the working platform is raised clear of the sea surface.
	enumeration	Livestock Carrier	16: A vessel designed to carry large quantities of live animals.
	enumeration	Sport Fishing	17: A vessel used in fishing for pleasure or competition.

Simple Type `Applicability_categoryOfVesselCode`

Namespace	http://www.iho.int/S131/2.0
Annotations	Custom enum: Applicability/categoryOfVessel

Diagram			
Type	restriction of xs:integer		
Facets	enumeration	1	A vessel which is designed for carrying general cargo, e.g. boxes, sacks.
	enumeration	2	A vessel designed to carry ISO containers.
	enumeration	3	A vessel which is designed for carrying liquid goods, for example oil or water.
	enumeration	4	A vessel which is designed for carrying bulk goods, e.g. coal, ore or grain.
	enumeration	5	A day trip or cabin vessel constructed and equipped to carry more than 12 passengers.
	enumeration	6	A vessel designed to allow road vehicles to be driven on and off; often a ferry.
	enumeration	7	A vessel designed to carry refrigerated cargo.
	enumeration	8	A vessel that is used and equipped for the fishing of living aquatic resources.
	enumeration	9	A vessel which provides a service such as a tug, anchor handler, survey or supply vessel.
	enumeration	10	A vessel designed for the conduct of military operations.
	enumeration	11	Either a tug and tow, or any combination of a tug providing propulsion to barges or vessels secured ahead or alongside.
	enumeration	12	A combination of tug(s) and non-powered tow(s).
	enumeration	13	A pleasure boat or watercraft, or an excursion vessel used for short cruises such as whale watching.
	enumeration	14	An installation which is designed to float at all times and which is normally anchored in position when deployed in the offshore gas and oil industry.
	enumeration	15	An exploration or project installation with legs which can be raised and lowered. The legs are raised when the installation is re-positioned. When stationary the legs are lowered to the sea floor and the working platform is raised clear of the sea surface.
	enumeration	16	A vessel designed to carry large quantities of live animals.
	enumeration	17	A vessel used in fishing for pleasure or competition.

	code	categoryOfMooringWarping-FacilityCode	required

Complex Type `MooringWarpingFacility_categoryOfMooringWarpingFacilityType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Restricted values of categoryOfMooringWarpingFacility in MooringWarpingFacility`
Diagram	Type	extension of MooringWarpingFacility_categoryOfMooringWarpingFacilityLabel
Type hierarchy	• xs:string • MooringWarpingFacility_categoryOfMooringWarpingFacilityLabel • MooringWarpingFacility_categoryOfMooringWarpingFacilityType
Used by	Element MooringWarpingFacilityType/categoryOfMooringWarpingFacility

Attributes	QName	Type	Use
	code	MooringWarpingFacility_categoryOfMooringWarpingFacilityCode	required

Complex Type `categoryOfPortSectionType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Classification of subdivisions of a port or harbour area by usage.`
Diagram	Type	extension of categoryOfPortSectionLabel
Type hierarchy	• xs:string • categoryOfPortSectionLabel • categoryOfPortSectionType

Attributes	QName	Type	Use
	code	categoryOfPortSectionCode	required

Complex Type `HarbourAreaSection_categoryOfPortSectionType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Restricted values of categoryOfPortSection in HarbourAreaSection`
Diagram	
Type	extension of HarbourAreaSection_categoryOfPortSectionLabel
Type hierarchy	• xs:string • HarbourAreaSection_categoryOfPortSectionLabel • HarbourAreaSection_categoryOfPortSectionType
Used by	Element HarbourAreaSectionType/categoryOfPortSection
Attributes	**QName** **Type** **Use** **code** HarbourAreaSection_categoryOfPortSectionCode required

Complex Type `WaterwayArea_categoryOfPortSectionType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Restricted values of categoryOfPortSection in WaterwayArea`
Diagram	Type	extension of WaterwayArea_categoryOfPortSectionLabel
Type hierarchy	• xs:string • WaterwayArea_categoryOfPortSectionLabel • WaterwayArea_categoryOfPortSectionType
Used by	Element WaterwayAreaType/categoryOfPortSection
Attributes	**QName** **Type** **Use** **code** WaterwayArea_categoryOfPortSectionCode required

Complex Type `categoryOfRelationshipType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Expresses constraints or requirements on vessel actions or activities in relation to a geographic feature, facility, or service.`
Diagram	Type	extension of categoryOfRelationshipLabel
Type hierarchy	• xs:string • categoryOfRelationshipLabel • categoryOfRelationshipType
Used by	Element PermissionTypeType/categoryOfRelationship
Attributes	**QName** **Type** **Use** **code** categoryOfRelationshipCode required

Complex Type `categoryOfScheduleType`

Namespace	http://www.iho.int/S131/2.0

Annotations	The type of schedule, for instance opening, closure, etc.
Diagram	Type	extension of categoryOfScheduleLabel
Type hierarchy	• xs:string • categoryOfScheduleLabel • categoryOfScheduleType
Attributes	**QName** / **Type** / **Use** **code** / categoryOfScheduleCode / required

Complex Type scheduleByDayOfWeek_categoryOfScheduleType

Namespace	http://www.iho.int/S131/2.0
Annotations	Restricted values of categoryOfSchedule in scheduleByDayOfWeek
Diagram	Type	extension of scheduleByDayOfWeek_categoryOfScheduleLabel
Type hierarchy	• xs:string • scheduleByDayOfWeek_categoryOfScheduleLabel • scheduleByDayOfWeek_categoryOfScheduleType
Used by	Element scheduleByDayOfWeekType/categoryOfSchedule
Attributes	**QName** / **Type** / **Use** **code** / scheduleByDayOfWeek_categoryOfScheduleCode / required

Complex Type categoryOfShorePowerFacilityType

Namespace	http://www.iho.int/S131/2.0
Annotations	Classification of equipment or installations that are used for providing shoreside electrical power to a vessel at berth.
Diagram	Type	extension of categoryOfShorePowerFacilityLabel
Type hierarchy	• xs:string • categoryOfShorePowerFacilityLabel • categoryOfShorePowerFacilityType

Attributes	QName	Type	Use
	code	categoryOfShorePowerFacilityCode	required

Complex Type `OnshorePowerFacility_categoryOfShorePowerFacilityType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Restricted values of categoryOfShorePowerFacility in OnshorePowerFacility`
Diagram	Type	extension of OnshorePowerFacility_categoryOfShorePowerFacilityLabel
Type hierarchy	• xs:string • OnshorePowerFacility_categoryOfShorePowerFacilityLabel • OnshorePowerFacility_categoryOfShorePowerFacilityType
Used by	Element OnshorePowerFacilityType/categoryOfShorePowerFacility

Attributes	QName	Type	Use
	code	OnshorePowerFacility_categoryOfShorePowerFacilityCode	required

Complex Type `categoryOfTemporalVariationType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`An assessment of the likelihood of change over time.`
Diagram	Type	extension of categoryOfTemporalVariationLabel
Type hierarchy	• xs:string • categoryOfTemporalVariationLabel • categoryOfTemporalVariationType

Attributes	QName	Type	Use
	code	categoryOfTemporalVariationCode	required

Complex Type `QualityOfNonBathymetricData_categoryOfTemporalVariationType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Restricted values of categoryOfTemporalVariation in QualityOfNonBathymetricData`
Diagram	
Type	extension of QualityOfNonBathymetricData_categoryOfTemporalVariationLabel
Type hierarchy	• xs:string • QualityOfNonBathymetricData_categoryOfTemporalVariationLabel • QualityOfNonBathymetricData_categoryOfTemporalVariationType
Used by	Element QualityOfNonBathymetricDataType/categoryOfTemporalVariation
Attributes	**QName** / **Type** / **Use** **code** / QualityOfNonBathymetricData_categoryOfTemporalVariationCode / required

Complex Type `categoryOfTerminalType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Classification of terminals according to type of use, purpose, or type of cargo loaded or unloaded.`
Diagram	Type	extension of categoryOfTerminalLabel
Type hierarchy	• xs:string • categoryOfTerminalLabel • categoryOfTerminalType
Attributes	**QName** / **Type** / **Use** **code** / categoryOfTerminalCode / required

Complex Type `Terminal_categoryOfTerminalType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Restricted values of categoryOfTerminal in Terminal`
Diagram	Type	extension of Terminal_categoryOfTerminalLabel
Type hierarchy	• xs:string • Terminal_categoryOfTerminalLabel • Terminal_categoryOfTerminalType
Used by	Element TerminalType/categoryOfTerminal
Attributes	**QName** / **Type** / **Use** **code** / Terminal_categoryOfTerminalCode / required

Complex Type `categoryOfTextType`

Namespace	http://www.iho.int/S131/2.0

Annotations	`Classification of completeness of textual information in relation to the source material from which it is derived.`
Diagram	Type	extension of categoryOfTextLabel
Type hierarchy	• xs:string • categoryOfTextLabel • categoryOfTextType
Attributes	**QName** / **Type** / **Use** **code** / categoryOfTextCode / required

Complex Type `textContent_categoryOfTextType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Restricted values of categoryOfText in textContent`
Diagram	Type	extension of textContent_categoryOfTextLabel
Type hierarchy	• xs:string • textContent_categoryOfTextLabel • textContent_categoryOfTextType
Used by	Element textContentType/categoryOfText
Attributes	**QName** / **Type** / **Use** **code** / textContent_categoryOf-TextCode / required

Complex Type `categoryOfVesselRegistryType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`The locality of vessel registration or enrolment relative to the nationality of a port, territorial sea, administrative area, exclusive zone or other location.`
Diagram	Type	extension of categoryOfVesselRegistryLabel
Type hierarchy	• xs:string • categoryOfVesselRegistryLabel • categoryOfVesselRegistryType

Attributes	QName	Type	Use
	code	categoryOfVesselRegistryCode	required

Complex Type `Applicability_categoryOfVesselRegistryType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Restricted values of categoryOfVesselRegistry in Applicability`
Diagram	Type	extension of Applicability_categoryOfVesselRegistryLabel
Type hierarchy	• xs:string • Applicability_categoryOfVesselRegistryLabel • Applicability_categoryOfVesselRegistryType
Used by	Element ApplicabilityType/categoryOfVesselRegistry

Attributes	QName	Type	Use
	code	Applicability_categoryOfVesselRegistryCode	required

Complex Type `categoryOfVoltageType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`The electrical voltage provided by the power supply station.`
Diagram	Type	extension of categoryOfVoltageLabel
Type hierarchy	• xs:string • categoryOfVoltageLabel • categoryOfVoltageType

Attributes	QName	Type	Use
	code	categoryOfVoltageCode	required

Complex Type `Berth_categoryOfVoltageType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Restricted values of categoryOfVoltage in Berth`
Diagram	
Type	extension of Berth_categoryOfVoltageLabel
Type hierarchy	• xs:string • Berth_categoryOfVoltageLabel • Berth_categoryOfVoltageType
Used by	Element BerthType/categoryOfVoltage
Attributes	**QName** **Type** **Use** **code** Berth_categoryOfVoltageCode required

Complex Type `OnshorePowerFacility_categoryOfVoltageType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Restricted values of categoryOfVoltage in OnshorePowerFacility`
Diagram	Type	extension of OnshorePowerFacility_categoryOfVoltageLabel
Type hierarchy	• xs:string • OnshorePowerFacility_categoryOfVoltageLabel • OnshorePowerFacility_categoryOfVoltageType
Used by	Element OnshorePowerFacilityType/categoryOfVoltage
Attributes	**QName** **Type** **Use** **code** OnshorePowerFacility_categoryOfVoltageCode required

Complex Type `comparisonOperatorType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Numerical comparison.`
Diagram	Type	extension of comparisonOperatorLabel
Type hierarchy	• xs:string • comparisonOperatorLabel • comparisonOperatorType
Attributes	**QName** **Type** **Use** **code** comparisonOperatorCode required

Complex Type `vesselMeasurementsSpecification_comparisonOperatorType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Restricted values of comparisonOperator in vesselMeasurementsSpecification`

Diagram	Type	extension of vesselMeasurementsSpecification_comparisonOperatorLabel
Type hierarchy	• xs:string • vesselMeasurementsSpecification_comparisonOperatorLabel • vesselMeasurementsSpecification_comparisonOperatorType
Used by	Element vesselMeasurementsSpecificationType/comparisonOperator
Attributes	**QName** / **Type** / **Use** **code** / vesselMeasurementsSpecification_comparisonOperatorCode / required

Complex Type `conditionType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`The various conditions of buildings and other constructions.`
Diagram	Type	extension of conditionLabel
Type hierarchy	• xs:string • conditionLabel • conditionType
Attributes	**QName** / **Type** / **Use** **code** / conditionCode / required

Complex Type `constructionInformation_conditionType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Restricted values of condition in constructionInformation`
Diagram	Type	extension of constructionInformation_conditionLabel
Type hierarchy	• xs:string • constructionInformation_conditionLabel • constructionInformation_conditionType
Used by	Element constructionInformationType/condition

Attributes	QName	Type	Use	
	code	constructionInformation_conditionCode	required	

Complex Type `dateEndType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`The latest date on which an object (for example a buoy) will be present.`
Diagram	Type	extension of S100_TruncatedDate
Type hierarchy	• S100_TruncatedDate • dateEndType
Used by	Elements fixedDateRangeType/dateEnd, periodicDateRangeType/dateEnd, surveyDateRangeType/dateEnd
Model	gDay | gMonth | gYear | gMonthDay | gYearMonth | date

Complex Type `dateFixedType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`The date of an event.`
Diagram	Type	extension of S100_TruncatedDate
Type hierarchy	• S100_TruncatedDate • dateFixedType
Used by	Element NonStandardWorkingDayType/dateFixed
Model	gDay | gMonth | gYear | gMonthDay | gYearMonth | date

Complex Type `dateStartType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`The earliest date on which an object (for example a buoy) will be present.`

Diagram	Type	extension of S100_TruncatedDate
Type hierarchy	• S100_TruncatedDate • dateStartType
Used by	Elements fixedDateRangeType/dateStart, periodicDateRangeType/dateStart, surveyDateRangeType/dateStart
Model	gDay | gMonth | gYear | gMonthDay | gYearMonth | date

Complex Type `dayOfWeekType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Any one of seven days in a week.`
Diagram	Type	extension of dayOfWeekLabel

Type hierarchy	• xs:string
	  • dayOfWeekLabel
	  • dayOfWeekType

Attributes	**QName** | **Type** | **Use** **code** | dayOfWeekCode | required

Complex Type `timeIntervalsByDayOfWeek_dayOfWeekType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Restricted values of dayOfWeek in timeIntervalsByDayOfWeek`
Diagram	Type	extension of timeIntervalsByDayOfWeek_dayOfWeekLabel

Type hierarchy	• xs:string
	  • timeIntervalsByDayOfWeek_dayOfWeekLabel
	  • timeIntervalsByDayOfWeek_dayOfWeekType

Used by	Element timeIntervalsByDayOfWeekType/dayOfWeek

Attributes	QName	Type	Use	
	code	timeIntervalsByDay-OfWeek_dayOfWeekCode	required	

Complex Type `dynamicResourceType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Whether a vessel must use a shore-based or other resource to obtain up-to-date information.`
Diagram	Type	extension of dynamicResourceLabel
Type hierar-chy	• xs:string • dynamicResourceLabel • dynamicResourceType

Attributes	QName	Type	Use	
	code	dynamicResourceCode	required	

Complex Type `weatherResource_dynamicResourceType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Restricted values of dynamicResource in weatherResource`
Diagram	Type	extension of weatherResource_dynamicResourceLabel
Type hierar-chy	• xs:string • weatherResource_dynamicResourceLabel • weatherResource_dynamicResourceType
Used by	Element weatherResourceType/dynamicResource

Attributes	QName	Type	Use	
	code	weatherResource_dynamicRe-sourceCode	required	

Complex Type `firefightingServiceType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Services for combating fires, provided by different methods.`
Diagram	
Type	extension of firefightingServiceLabel
Type hierarchy	• xs:string • firefightingServiceLabel • firefightingServiceType
Attributes	**QName** / **Type** / **Use** **code** / firefightingServiceCode / required

Complex Type `AvailablePortServices_firefightingServiceType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Restricted values of firefightingService in AvailablePortServices`
Diagram	Type	extension of AvailablePortServices_firefightingServiceLabel
Type hierarchy	• xs:string • AvailablePortServices_firefightingServiceLabel • AvailablePortServices_firefightingServiceType
Used by	Element AvailablePortServicesType/firefightingService
Attributes	**QName** / **Type** / **Use** **code** / AvailablePortServices_firefightingServiceCode / required

Complex Type `iSPSLevelType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Classification of ISPS security levels according to the ISPS Code.`
Diagram	Type	extension of iSPSLevelLabel
Type hierarchy	• xs:string • iSPSLevelLabel • iSPSLevelType
Attributes	**QName** / **Type** / **Use** **code** / iSPSLevelCode / required

Complex Type `AnchorageArea_iSPSLevelType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Restricted values of iSPSLevel in AnchorageArea`

Diagram	Type	extension of AnchorageArea_iSPSLevelLabel
Type hierarchy	• xs:string • AnchorageArea_iSPSLevelLabel • AnchorageArea_iSPSLevelType
Used by	Element AnchorageAreaType/iSPSLevel
Attributes	**QName** / **Type** / **Use** **code** / AnchorageArea_iSPSLevel-Code / required

Complex Type `DockArea_iSPSLevelType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Restricted values of iSPSLevel in DockArea`
Diagram	Type	extension of DockArea_iSPSLevelLabel
Type hierarchy	• xs:string • DockArea_iSPSLevelLabel • DockArea_iSPSLevelType
Used by	Element DockAreaType/iSPSLevel
Attributes	**QName** / **Type** / **Use** **code** / DockArea_iSPSLevelCode / required

Complex Type `DumpingGround_iSPSLevelType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Restricted values of iSPSLevel in DumpingGround`
Diagram	Type	extension of DumpingGround_iSPSLevelLabel
Type hierarchy	• xs:string • DumpingGround_iSPSLevelLabel • DumpingGround_iSPSLevelType
Used by	Element DumpingGroundType/iSPSLevel

Attributes	QName	Type	Use
	code	DumpingGround_iSPSLevel-Code	required

Complex Type `HarbourAreaAdministrative_iSPSLevelType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Restricted values of iSPSLevel in HarbourAreaAdministrative`
Diagram	Type	extension of HarbourAreaAdministrative_iSPSLevelLabel
Type hierar-chy	• xs:string • HarbourAreaAdministrative_iSPSLevelLabel • HarbourAreaAdministrative_iSPSLevelType
Used by	Element HarbourAreaAdministrativeType/iSPSLevel

Attributes	QName	Type	Use
	code	HarbourAreaAdministra-tive_iSPSLevelCode	required

Complex Type `HarbourAreaSection_iSPSLevelType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Restricted values of iSPSLevel in HarbourAreaSection`
Diagram	Type	extension of HarbourAreaSection_iSPSLevelLabel
Type hierar-chy	• xs:string • HarbourAreaSection_iSPSLevelLabel • HarbourAreaSection_iSPSLevelType
Used by	Element HarbourAreaSectionType/iSPSLevel

Attributes	QName	Type	Use
	code	HarbourAreaSec-tion_iSPSLevelCode	required

Complex Type `HarbourBasin_iSPSLevelType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Restricted values of iSPSLevel in HarbourBasin`

Diagram	Type	extension of HarbourBasin_iSPSLevelLabel
Type hierarchy	• xs:string • HarbourBasin_iSPSLevelLabel • HarbourBasin_iSPSLevelType
Used by	Element HarbourBasinType/iSPSLevel
Attributes	**QName** / **Type** / **Use** **code** / HarbourBasin_iSPSLevelCode / required

Complex Type `PilotBoardingPlace_iSPSLevelType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Restricted values of iSPSLevel in PilotBoardingPlace`
Diagram	Type	extension of PilotBoardingPlace_iSPSLevelLabel
Type hierarchy	• xs:string • PilotBoardingPlace_iSPSLevelLabel • PilotBoardingPlace_iSPSLevelType
Used by	Element PilotBoardingPlaceType/iSPSLevel
Attributes	**QName** / **Type** / **Use** **code** / PilotBoarding-Place_iSPSLevelCode / required

Complex Type `SeaplaneLandingArea_iSPSLevelType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Restricted values of iSPSLevel in SeaplaneLandingArea`
Diagram	Type	extension of SeaplaneLandingArea_iSPSLevelLabel
Type hierarchy	• xs:string • SeaplaneLandingArea_iSPSLevelLabel • SeaplaneLandingArea_iSPSLevelType
Used by	Element SeaplaneLandingAreaType/iSPSLevel

Attributes	QName	Type	Use	
	code	SeaplaneLandingArea_iSPSLevelCode	required	

Complex Type `TurningBasin_iSPSLevelType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Restricted values of iSPSLevel in TurningBasin`
Diagram	Type	extension of TurningBasin_iSPSLevelLabel
Type hierarchy	• xs:string • TurningBasin_iSPSLevelLabel • TurningBasin_iSPSLevelType
Used by	Element TurningBasinType/iSPSLevel

Attributes	QName	Type	Use	
	code	TurningBasin_iSPSLevelCode	required	

Complex Type `logicalConnectivesType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Expresses whether all the constraints described by its co-attributes must be satisfied, or only one such constraint need be satisfied.`
Diagram	Type	extension of logicalConnectivesLabel
Type hierarchy	• xs:string • logicalConnectivesLabel • logicalConnectivesType

Attributes	QName	Type	Use	
	code	logicalConnectivesCode	required	

Complex Type `Applicability_logicalConnectivesType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Restricted values of logicalConnectives in Applicability`
Diagram	
Type	extension of Applicability_logicalConnectivesLabel
Type hierarchy	• xs:string • Applicability_logicalConnectivesLabel • Applicability_logicalConnectivesType
Used by	Element ApplicabilityType/logicalConnectives
Attributes	**QName** **Type** **Use** **code** Applicability_logicalConnectivesCode required

Complex Type `medicalServiceType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Services for the prevention or treatment of, or response to injury or illness.`
Diagram	Type	extension of medicalServiceLabel
Type hierarchy	• xs:string • medicalServiceLabel • medicalServiceType
Attributes	**QName** **Type** **Use** **code** medicalServiceCode required

Complex Type `AvailablePortServices_medicalServiceType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Restricted values of medicalService in AvailablePortServices`
Diagram	Type	extension of AvailablePortServices_medicalServiceLabel
Type hierarchy	• xs:string • AvailablePortServices_medicalServiceLabel • AvailablePortServices_medicalServiceType
Used by	Element AvailablePortServicesType/medicalService
Attributes	**QName** **Type** **Use** **code** AvailablePortServices_medicalServiceCode required

Complex Type `membershipType`

Namespace	http://www.iho.int/S131/2.0

Annotations	`Indicates whether a vessel is included or excluded from the regulation/restriction/recommendation/ nautical information.`
Diagram	Type	extension of membershipLabel
Type hierarchy	• xs:string • membershipLabel • membershipType
Used by	Element InclusionTypeType/membership
Attributes	**QName** **Type** **Use** **code** membershipCode required

Complex Type `methodOfSecuringType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`The process, arrangement or scheme of attachment used to secure a vessel to a berth.`
Diagram	Type	extension of methodOfSecuringLabel
Type hierarchy	• xs:string • methodOfSecuringLabel • methodOfSecuringType
Attributes	**QName** **Type** **Use** **code** methodOfSecuringCode required

Complex Type `Berth_methodOfSecuringType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Restricted values of methodOfSecuring in Berth`
Diagram	Type	extension of Berth_methodOfSecuringLabel
Type hierarchy	• xs:string • Berth_methodOfSecuringLabel • Berth_methodOfSecuringType
Used by	Element BerthType/methodOfSecuring

Attributes	QName	Type	Use	
	code	Berth_methodOfSecuringCode	required	

Complex Type `nameUsageType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Classification of the type and display level of the name of a feature in an end-user system.`
Diagram	Type	extension of nameUsageLabel
Type hierarchy	• xs:string • nameUsageLabel • nameUsageType

Attributes	QName	Type	Use	
	code	nameUsageCode	required	

Complex Type `featureName_nameUsageType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Restricted values of nameUsage in featureName`
Diagram	Type	extension of featureName_nameUsageLabel
Type hierarchy	• xs:string • featureName_nameUsageLabel • featureName_nameUsageType
Used by	Element featureNameType/nameUsage

Attributes	QName	Type	Use	
	code	featureName_nameUsageCode	required	

Complex Type `onlineFunctionType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Code for function performed by the online resource.`
Diagram	
Type	extension of onlineFunctionLabel
Type hierarchy	• xs:string • onlineFunctionLabel • onlineFunctionType
Attributes	**QName** / **Type** / **Use** **code** / onlineFunctionCode / required

Complex Type `onlineResource_onlineFunctionType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Restricted values of onlineFunction in onlineResource`
Diagram	Type	extension of onlineResource_onlineFunctionLabel
Type hierarchy	• xs:string • onlineResource_onlineFunctionLabel • onlineResource_onlineFunctionType
Used by	Element onlineResourceType/onlineFunction
Attributes	**QName** / **Type** / **Use** **code** / onlineResource_onlineFunctionCode / required

Complex Type `pilotMovementType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Classification of pilot activity by arrival, departure, or change of pilot. It may also describe the place where the pilot's advice begins, ends, or is transferred to a different pilot.`
Diagram	Type	extension of pilotMovementLabel
Type hierarchy	• xs:string • pilotMovementLabel • pilotMovementType
Attributes	**QName** / **Type** / **Use** **code** / pilotMovementCode / required

Complex Type `PilotBoardingPlace_pilotMovementType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Restricted values of pilotMovement in PilotBoardingPlace`

Diagram	Type	extension of PilotBoardingPlace_pilotMovementLabel
Type hierarchy	• xs:string • PilotBoardingPlace_pilotMovementLabel • PilotBoardingPlace_pilotMovementType
Used by	Element PilotBoardingPlaceType/pilotMovement
Attributes	**QName** / **Type** / **Use** **code** / PilotBoardingPlace_pilot-MovementCode / required

Complex Type `productType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`The various substances which are transported, stored or exploited.`
Diagram	Type	extension of productLabel
Type hierarchy	• xs:string • productLabel • productType
Attributes	**QName** / **Type** / **Use** **code** / productCode / required

Complex Type `Terminal_productType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Restricted values of product in Terminal`
Diagram	Type	extension of Terminal_productLabel
Type hierarchy	• xs:string • Terminal_productLabel • Terminal_productType
Used by	Element TerminalType/product

Attributes	**QName**	**Type**	**Use**	
	code	Terminal_productCode	required	

Complex Type `qualityOfHorizontalMeasurementType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`The degree of reliability attributed to a position.`
Diagram	Type	extension of qualityOfHorizontalMeasurementLabel
Type hierarchy	• xs:string • qualityOfHorizontalMeasurementLabel • qualityOfHorizontalMeasurementType

Attributes	**QName**	**Type**	**Use**	
	code	qualityOfHorizontalMeasurementCode	required	

Complex Type `SpatialQuality_qualityOfHorizontalMeasurementType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Restricted values of qualityOfHorizontalMeasurement in SpatialQuality`
Diagram	Type	extension of SpatialQuality_qualityOfHorizontalMeasurementLabel
Type hierarchy	• xs:string • SpatialQuality_qualityOfHorizontalMeasurementLabel • SpatialQuality_qualityOfHorizontalMeasurementType
Used by	Element SpatialQualityType/qualityOfHorizontalMeasurement

Attributes	**QName**	**Type**	**Use**	
	code	SpatialQuality_qualityOfHorizontalMeasurementCode	required	

Complex Type `repairServiceType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Work or maintenance activities whereby vessels or equipment are restored to working order, renovated, or improved in condition.`
Diagram	
Type	extension of repairServiceLabel
Type hierarchy	• xs:string • repairServiceLabel • repairServiceType
Attributes	**QName** / **Type** / **Use** **code** / repairServiceCode / required

Complex Type `AvailablePortServices_repairServiceType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Restricted values of repairService in AvailablePortServices`
Diagram	Type	extension of AvailablePortServices_repairServiceLabel
Type hierarchy	• xs:string • AvailablePortServices_repairServiceLabel • AvailablePortServices_repairServiceType
Used by	Element AvailablePortServicesType/repairService
Attributes	**QName** / **Type** / **Use** **code** / AvailablePortServices_repairServiceCode / required

Complex Type `reportedDateType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`The date that the item was observed, done, or investigated.`
Diagram	Type	extension of S100_TruncatedDate
Type hierarchy	• S100_TruncatedDate • reportedDateType
Used by	Element sourceIndicationType/reportedDate
Model	gDay | gMonth | gYear | gMonthDay | gYearMonth | date

Complex Type `shipSanitationControlType`

Namespace	http://www.iho.int/S131/2.0

Annotations	`Application of measures to ensure that a vessel is free of disease and disease risks, or issue of completion or exemption certificates for such measures.`
Diagram	Type	extension of shipSanitationControlLabel
Type hierarchy	• xs:string • shipSanitationControlLabel • shipSanitationControlType

Attributes	QName	Type	Use
	code	shipSanitationControlCode	required

Complex Type `AvailablePortServices_shipSanitationControlType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Restricted values of shipSanitationControl in AvailablePortServices`
Diagram	Type	extension of AvailablePortServices_shipSanitationControlLabel
Type hierarchy	• xs:string • AvailablePortServices_shipSanitationControlLabel • AvailablePortServices_shipSanitationControlType
Used by	Element AvailablePortServicesType/shipSanitationControl

Attributes	QName	Type	Use
	code	AvailablePortServices_shipSanitationControlCode	required

Complex Type `sourceTypeType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Type of the source.`
Diagram	Type	extension of sourceTypeLabel
Type hierarchy	• xs:string • sourceTypeLabel • sourceTypeType

Attributes	QName	Type	Use
	code	sourceTypeCode	required

Complex Type `sourceIndication_sourceTypeType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Restricted values of sourceType in sourceIndication`
Diagram	Type	extension of sourceIndication_sourceTypeLabel
Type hierarchy	• xs:string • sourceIndication_sourceTypeLabel • sourceIndication_sourceTypeType
Used by	Element sourceIndicationType/sourceType

Attributes	QName	Type	Use

Diagram	Type	extension of transportConnectionLabel_Union
Type hierarchy	• xs:anySimpleType • transportConnectionLabel_Union • AvailablePortServices_transportConnectionType
Used by	Element AvailablePortServicesType/transportConnection

Attributes

QName	Type	Use	
code	AvailablePortServices_transportConnectionCode	optional	

Complex Type `bearingInformationType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`A bearing is the direction one object is from another object.`

Diagram	Used by	Element graphicType/bearingInformation
Model	cardinalDirection{0,1} , distance{0,1} , information* , orientation{0,1}

Complex Type `informationType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Textual information about the feature. The information may be provided as a string of text or as a file name of a single external text file that contains the text.`
Diagram	Used by	Elements ApplicabilityType/information, ContactDetailsType/information, NonStandardWorkingDayType/information, QualityOfNonBathymetricDataType/information, ServiceHoursType/information, SoundingDatumType/information, VerticalDatumOfDataType/information, bearingInformationType/information, textContentType/information
Model	fileLocator{0,1} , fileReference{0,1} , headline* , language{0,1} , text{0,1}

Complex Type `orientationType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`(1) The angular distance measured from true north to the major axis of the feature. (2) In ECDIS, the mode in which information on the ECDIS is being presented. Typical modes include: north-up - as shown on a nautical chart, north is at the top of the display; Ships head-up - based on the actual heading of the ship, (e.g. Ships gyrocompass); course-up display - based on the course or route being taken.`
Diagram	Used by	Elements FenderLineType/orientation, bearingInformationType/orientation
Model	orientationUncertainty{0,1} , orientationValue

Complex Type `cargoServicesDescriptionType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Description of services related to the goods or items carried by vessels.`
Diagram	
Used by	Element	generalHarbourInformationType/cargoServicesDescription
Model	textContent+	

Complex Type `textContentType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Textual material, or a pointer to a resource providing textual material. May be accompanied by basic information about its source and relationship to the source.`
Diagram	Used by	Elements	AbstractRxNType/textContent, AuthorityType/textContent, AvailablePortServicesType/textContent, EntranceType/textContent, FeatureTypeType/textContent, cargoServicesDescriptionType/textContent, constructionInformationType/textContent, depthsDescriptionType/textContent, facilitiesLayoutDescriptionType/textContent, generalPortDescriptionType/textContent, landmarkDescriptionType/textContent, limitsDescriptionType/textContent, majorLightDescriptionType/textContent, markedByType/textContent, offshoreMarkDescriptionType/textContent, usefulMarkDescriptionType/textContent, weatherResourceType/textContent
Model	categoryOfText{0,1} , information* , onlineResource{0,1} , sourceIndication*	

Complex Type `onlineResourceType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Information about online sources from which a resource or data can be obtained.`
Diagram	Used by	Elements	ContactDetailsType/onlineResource, textContentType/onlineResource, weatherResourceType/onlineResource
Model	linkage , protocol{0,1} , applicationProfile{0,1} , nameOfResource{0,1} , onlineResourceDescription{0,1} , onlineFunction{0,1} , protocolRequest{0,1}	

Complex Type `sourceIndicationType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Information about the source document, publication, or reference from which object data or textual material included or referenced in a dataset are derived.`

Diagram	Used by	Elements FeatureTypeType/sourceIndication, InformationTypeType/sourceIndication, QualityOfNonBathymetricDataType/sourceIndication, textContentType/sourceIndication
Model	categoryOfAuthority{0,1} , countryName{0,1} , source{0,1} , sourceType{0,1} , reportedDate{0,1} , featureName*

Complex Type `featureNameType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Provides the name of an entity, defines the national language of the name, and provides the option to display the name at various system display settings.`
Diagram	Used by	Elements FeatureTypeType/featureName, InformationTypeType/featureName, sourceIndicationType/featureName
Model	language , name , nameUsage{0,1}

Complex Type `constructionInformationType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`A description of construction or other development in a location where the work will affect vessel operations such as navigation, maneuvering or docking/berthing.`
Diagram	Used by	Element generalHarbourInformationType/constructionInformation
Model	fixedDateRange{0,1} , condition{0,1} , development , locationByText{0,1} , textContent*

Complex Type `fixedDateRangeType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`An active period of a single fixed event or occurrence, as the date range between discrete start and end dates.`

Diagram	Used by	Elements FeatureTypeType/fixedDateRange, InformationTypeType/fixedDateRange, constructionInformation-Type/fixedDateRange, spatialAccuracyType/fixedDateRange
Model	dateStart{0,1} , dateEnd{0,1}

Complex Type `contactAddressType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Direction or superscription of a letter, package, etc., specifying the name of the place to which it is directed, and optionally a contact person or organisation who should receive it.`
Diagram	Used by	Element ContactDetailsType/contactAddress
Model	deliveryPoint* , cityName{0,1} , administrativeDivision{0,1} , countryName{0,1} , postalCode{0,1}

Complex Type `depthsDescriptionType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Textual description of the characteristics and notable matters pertaining to depths in an area.`
Diagram	Used by	Elements AnchorageAreaType/depthsDescription, DockAreaType/depthsDescription, DumpingGround-Type/depthsDescription, HarbourBasinType/depthsDescription, PilotBoardingPlaceType/depthsDe-scription, SeaplaneLandingAreaType/depthsDescription, TurningBasinType/depthsDescription, Water-wayAreaType/depthsDescription
Model	categoryOfDepthsDescription , textContent+

Complex Type `facilitiesLayoutDescriptionType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Textual description of the layout of port facilities.`
Diagram	Used by	Elements HarbourAreaSectionType/facilitiesLayoutDescription, generalHarbourInformationType/facilitiesLay-outDescription
Model	textContent+

Complex Type `frequencyPairType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`A pair of frequencies for transmitting and receiving radio signals. The shore station transmits and receives on the frequencies indicated.`
Diagram	Used by	Element ContactDetailsType/frequencyPair
Model	frequencyShoreStationReceives{0,1} , frequencyShoreStationTransmits

Complex Type `generalHarbourInformationType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`General information about the port or harbour area.`
Diagram	Used by	Element HarbourAreaAdministrativeType/generalHarbourInformation
Model	generalPortDescription{0,1} , facilitiesLayoutDescription{0,1} , limitsDescription{0,1} , constructionInformation{0,1} , cargoServicesDescription{0,1} , weatherResource*

Complex Type `generalPortDescriptionType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`General, introductory information about the port.`
Diagram	Used by	Element generalHarbourInformationType/generalPortDescription
Model	textContent+

Complex Type `limitsDescriptionType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Description of the area covered by the information specified.`
Diagram	Used by	Elements OuterLimitType/limitsDescription, generalHarbourInformationType/limitsDescription
Model	textContent+

Complex Type `weatherResourceType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Links for relevant weather related information.`
Diagram	Used by	Element generalHarbourInformationType/weatherResource
Model	onlineResource{0,1} , dynamicResource{0,1} , textContent{0,1}

Complex Type `graphicType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Pictorial information such as a photograph, sketch or other graphic, optionally accompanied by descriptive information about the graphic and the location relative to its subject from which it was made.`
Diagram	Used by	Elements FeatureTypeType/graphic, InformationTypeType/graphic
Model	pictorialRepresentation+ , pictureCaption{0,1} , sourceDate{0,1} , pictureInformation{0,1} , bearingInformation{0,1}

Complex Type `horizontalPositionUncertaintyType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`The best estimate of the accuracy of a position.`
Diagram	Used by	Elements QualityOfNonBathymetricDataType/horizontalPositionUncertainty, spatialAccuracyType/horizontalPositionUncertainty
Model	uncertaintyFixed , uncertaintyVariableFactor{0,1}

Complex Type `landmarkDescriptionType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Textual description of selected landmarks that have significance in an area.`
Diagram	Used by	Elements EntranceType/landmarkDescription, OuterLimitType/landmarkDescription

Model	textContent+

Complex Type `majorLightDescriptionType`

Namespace	http://www.iho.int/S131/2.0
Annotations	A description of navigationally significant lights essential for marking landfalls, offshore dangers, shipping routes, port access channels or protection of the marine environment.
Diagram	Used by	Elements EntranceType/majorLightDescription, OuterLimitType/majorLightDescription
Model	textContent+

Complex Type `markedByType`

Namespace	http://www.iho.int/S131/2.0
Annotations	Description of the aids to navigation used to mark an area or object.
Diagram	Used by	Elements AnchorageAreaType/markedBy, DockAreaType/markedBy, DumpingGroundType/markedBy, EntranceType/markedBy, HarbourBasinType/markedBy, OuterLimitType/markedBy, PilotBoardingPlaceType/markedBy, SeaplaneLandingAreaType/markedBy, TurningBasinType/markedBy, WaterwayAreaType/markedBy
Model	textContent+

Complex Type `offshoreMarkDescriptionType`

Namespace	http://www.iho.int/S131/2.0
Annotations	Description of aids to navigation or prominent marks located away from the shore.
Diagram	Used by	Elements EntranceType/offshoreMarkDescription, OuterLimitType/offshoreMarkDescription
Model	textContent+

Complex Type `periodicDateRangeType`

Namespace	http://www.iho.int/S131/2.0
Annotations	The active period of a recurring event or occurrence.
Diagram	Used by	Elements FeatureTypeType/periodicDateRange, InformationTypeType/periodicDateRange
Model	dateStart , dateEnd

Complex Type `rxNCodeType`

Namespace	http://www.iho.int/S131/2.0
Annotations	A summary of the impact of the most common types of regulation, restriction, recommendation and nautical information on a vessel.

Diagram	Used by	Elements AbstractRxNType/rxNCode, FeatureTypeType/rxNCode
Model	categoryOfRxN{0,1} , actionOrActivity{0,1} , headline*

Complex Type `scheduleByDayOfWeekType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`The nature and timings of a daily schedule by days of the week.`
Diagram	Used by	Element ServiceHoursType/scheduleByDayOfWeek
Model	categoryOfSchedule{0,1} , text{0,1} , timeIntervalsByDayOfWeek+

Complex Type `timeIntervalsByDayOfWeekType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`The regular weekly operation times of a service or schedule.`
Diagram	Used by	Element scheduleByDayOfWeekType/timeIntervalsByDayOfWeek
Model	dayOfWeek{0,7} , dayOfWeekIsRange{0,1} , timeOfDayStart* , timeOfDayEnd*

Complex Type `spatialAccuracyType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Provides an indication of the vertical and horizontal positional uncertainty of bathymetric data, optionally within a specified date range.`
Diagram	Used by	Element SpatialQualityType/spatialAccuracy
Model	fixedDateRange{0,1} , horizontalPositionUncertainty{0,1} , verticalUncertainty{0,1}

Complex Type `verticalUncertaintyType`

Namespace	http://www.iho.int/S131/2.0
Annotations	The best estimate of the vertical accuracy of depths, heights, vertical distances and vertical clearances.
Diagram	Used by	Elements QualityOfNonBathymetricDataType/verticalUncertainty, spatialAccuracyType/verticalUncertainty
Model	uncertaintyFixed , uncertaintyVariableFactor{0,1}

Complex Type `surveyDateRangeType`

Namespace	http://www.iho.int/S131/2.0
Annotations	The complex attribute describes the period of the hydrographic survey, as the time between its sub-attributes.
Diagram	Used by	Element QualityOfNonBathymetricDataType/surveyDateRange
Model	dateStart{0,1} , dateEnd

Complex Type `telecommunicationsType`

Namespace	http://www.iho.int/S131/2.0
Annotations	A means or channel of communicating at a distance by electrical or electromagnetic means such as telegraphy, telephony, or broadcasting.
Diagram	Used by	Element ContactDetailsType/telecommunications
Model	categoryOfCommunicationPreference{0,1} , telecommunicationIdentifier , telecommunicationCarrier{0,1} , contactInstructions{0,1} , telecommunicationService*

Complex Type `usefulMarkDescriptionType`

Namespace	http://www.iho.int/S131/2.0
Annotations	Description of Aids to Navigation or prominent marks which are usually clearly visible and identifiable enough to be used in determining location or direction.
Diagram	
Used by	Elements	EntranceType/usefulMarkDescription, OuterLimitType/usefulMarkDescription
Model	textContent+	

Complex Type `vesselMeasurementsSpecificationType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Combinations of values of measurable characteristics or dimensions of vessels, used to specify size and tonnage ranges.`
Diagram	Used by	Element	ApplicabilityType/vesselMeasurementsSpecification
Model	comparisonOperator , vesselsCharacteristics , vesselsCharacteristicsValue , vesselsCharacteristicsUnit	

Complex Type `InformationTypeType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`Generalized information type which carries all the common attributes.`
Diagram	Type	extension of AbstractFeatureType	
Type hierarchy	• gml:AbstractGMLType	

	• gml:AbstractFeatureType • AbstractFeatureType • InformationTypeType
Properties	abstract: `false`
Used by	Complex Types: AbstractRxNType, ApplicabilityType, AuthorityType, AvailablePortServicesType, ContactDetailsType, EntranceType, NonStandardWorkingDayType, ServiceHoursType
Model	gml:boundedBy{0,1} , featureName* , fixedDateRange{0,1} , periodicDateRange* , graphic* , sourceIndication*

Attributes

QName	Type	Use	
gml:id	ID	required	
	The attribute gml:id supports provision of a handle for the XML element representing a GML Object. Its use is mandatory for all GML objects. It is of XML type ID, so is constrained to be unique in the XML document within which it occurs.		

Complex Type `AbstractRxNType`

Namespace	http://www.iho.int/S131/2.0
Annotations	An abstract superclass for information types that encode rules, recommendations, and general information in text or graphic form.

Diagram	Type	extension of InformationTypeType
Type hierarchy	• gml:AbstractGMLType • gml:AbstractFeatureType • AbstractFeatureType • InformationTypeType • AbstractRxNType

Properties	abstract:	`false`
Used by	Complex Types	NauticalInformationType, RecommendationsType, RegulationsType, RestrictionsType
Model	gml:boundedBy{0,1} , featureName* , fixedDateRange{0,1} , periodicDateRange* , graphic* , sourceIndication* , categoryOfAuthority{0,1} , rxNCode* , textContent* , isApplicableTo* , theOrganisation*	

Attributes

QName	Type	Use
gml:id	ID	required
	`The attribute gml:id supports provision of a handle for the XML element representing a GML Object. Its use is mandatory for all GML objects. It is of XML type ID, so is constrained to be unique in the XML document within which it occurs.`	

Complex Type `isApplicableToType`

Namespace	http://www.iho.int/S131/2.0
Annotations	`The object or class of objects to which the regulation, restriction, recommendation, or nautical information applies`
Diagram	Type	extension of gml:ReferenceType
Type hierarchy	• gml:ReferenceType • isApplicableToType
Used by	Element AbstractRxNType/isApplicableTo
Model	InclusionType

Attributes

QName	Type	Fixed	Default	Use	
nilReason	gml:NilReasonType			optional	
owns	boolean		false	optional

QName	Type	Use	
gml:id	ID	required	
	The attribute gml:id supports provision of a handle for the XML element representing a GML Object. Its use is mandatory for all GML objects. It is of XML type ID, so is constrained to be unique in the XML document within which it occurs.		

Complex Type `DolphinType`

Namespace	http://www.iho.int/S131/2.0
Annotations	A post or group of posts, used for mooring or warping a vessel, or as an aid to navigation. The dolphin may be in the water, on a wharf or on the beach.

Facets	enumeration	2	The administration to prevent or detect and prosecute violations of rules and regulations at international boundaries.
	enumeration	3	The department of government, or civil force, charged with maintaining public order.
	enumeration	4	Person or corporation, owners of, or entrusted with or invested with the power of managing a port. May be called a Harbour Board, Port Trust, Port Commission, Harbour Commission, Marine Department.
	enumeration	5	The authority controlling people entering a country.
	enumeration	6	The authority with responsibility for checking the validity of the health declaration of a vessel and for declaring free pratique.
	enumeration	7	Organization keeping watch on shipping and coastal waters according to governmental law; normally the authority with responsibility for search and rescue.
	enumeration	8	The authority with responsibility for preventing infection of the agriculture of a country and for the protection of the agricultural interests of a country.
	enumeration	9	A military authority which provides control of access to or approval for transit through designated areas or airspace.
	enumeration	10	A private or publicly owned company or commercial enterprise which exercises control of facilities, for example a calibration area.
	enumeration	11	A governmental or military force with jurisdiction in territorial waters. Examples could include Gendarmerie Maritime, Carabinierie, and Guardia Civil.
	enumeration	12	An authority with responsibility for the protection of the environment.
	enumeration	13	An authority with responsibility for the control of fisheries.
	enumeration	14	An authority with responsibility for the control and movement of money.
	enumeration	15	A national or regional authority charged with administration of maritime affairs.
	enumeration	16	The agency or establishment for collecting duties, tolls.

Type	HarbourAreaSection_categoryOfPortSectionCode		
Properties	use:	`required`	
Facets	enumeration	`1`	`The main navigable channel in a harbour or its approaches, for vessels of larger size.`
	enumeration	`3`	`A body of water at a berth or anchor berth, of adequate dimensions to allow a vessel to make fast to the shore, mooring buoys, berthing dolphins or to anchor.`
	enumeration	`8`	`An area in which sea-planes anchor or may anchor.`
	enumeration	`9`	`An area of water or channel enlargement of increased depth compared to adjacent areas, where the depth is maintained by dredging operations.`
	enumeration	`11`	`The area around a port facility or harbour installation within which vessels are prohibited from entering without permission.`
	enumeration	`12`	`A general berth for use by vessels for short term waiting until a loading or discharging berth is available.`
Used by	Complex Type	HarbourAreaSection_categoryOfPortSectionType	

Attribute `WaterwayArea_categoryOfPortSectionType / @code`

Namespace	No namespace		
Type	WaterwayArea_categoryOfPortSectionCode		
Properties	use:	`required`

Used by	Complex Type	OnshorePowerFacility_categoryOfShorePowerFacilityType	

Attribute `categoryOfTemporalVariationType / @code`

Namespace	No namespace		
Type	categoryOfTemporalVariationCode		
Properties	use:	required	
Facets	enumeration	1	Indication of the possible impact of a significant event (for example hurricane, earthquake, volcanic eruption, landslide, etc), which is considered likely to have changed the seafloor or landscape significantly.
	enumeration	2	Continuous or frequent change (for example river siltation, sand waves, seasonal storms, ice bergs, etc) that is likely to result in new significant shoaling.
	enumeration	3	Continuous or frequent change (for example sand wave shift, seasonal storms, ice bergs, etc) that is not likely to result in new significant shoaling.
	enumeration	4	Continuous or frequent change to non-bathymetric features (for example river siltation, glacier creep/recession, sand dunes, buoys, marine farms, etc).
	enumeration	5	Significant change to the seafloor is not expected.
	enumeration	6	Not having been assessed.
Used by	Complex Type	categoryOfTemporalVariationType	

Attribute `QualityOfNonBathymetricData_categoryOfTemporalVariationType / @code`

Namespace	No namespace		
Type	QualityOfNonBathymetricData_categoryOfTemporalVariationCode		
Properties	use:	required

Properties	use:	required	
Facets	enumeration	1	A thick, slippery liquid that will not dissolve in water, usually petroleum based in the context of storage tanks.
	enumeration	2	A substance with particles that can move freely, usually a fuel substance in the context of storage tanks.
	enumeration	4	A general term for rock and rock fragments ranging in size from pebbles and gravel to boulders or large rock masses.
	enumeration	5	A hard black mineral that is burned as fuel.
	enumeration	6	A solid rock or mineral from which metal is obtained.
	enumeration	7	Any substance obtained by or used in a chemical process.
	enumeration	9	A white fluid secreted by female mammals as food for their young.
	enumeration	10	A mineral from which aluminum is obtained.
	enumeration	11	A solid substance obtained after gas and tar have been extracted from coal, used as a fuel.
	enumeration	12	An oblong lump of cast iron metal.
	enumeration	13	Sodium chloride obtained from mines or by the evaporation of sea water.
	enumeration	14	Loose material consisting of small but easily distinguishable, separate grains, between 0.0625 and 2.000 millimetres in diameter.
	enumeration	15	Wood prepared for use in building or carpentry.
	enumeration	16	Powdery fragments of wood made in sawing timber or coarse chips produced for use in manufacturing pressed board.
	enumeration	17	Discarded metal suitable for being reprocessed.
	enumeration	18	Natural gas that has been liquefied for ease of transport by cooling the gas to -162 Celsius.
	enumeration	19	A compressed gas consisting of flammable light hydrocarbons and derived from petroleum.
	enumeration	20	The fermented juice of grapes.
	enumeration	21	A substance made of powdered lime and clay, mixed with water.
	enumeration	22	A small hard seed, especially that of any cereal plant such as wheat, rice, corn, rye etc.

Facets	enumeration	1	The position(s) was(were) determined by the operation of making measurements for determining the relative position of points on, above or beneath the earth's surface. Survey implies a regular, controlled survey of any date.
	enumeration	2	Survey data is does not exist or is very poor.
	enumeration	3	Not surveyed to modern standards; or due to its age, scale, or positional or vertical uncertainties is not suitable to the type of navigation expected in the area.
	enumeration	4	A position that is considered to be less than third-order accuracy, but is generally considered to be within 30.5 metres of its correct geographic location. Also may apply to an object whose position does not remain fixed.
	enumeration	5	Of uncertain position. The expression is used principally on charts to indicate that a wreck, shoal, etc., has been reported in various positions and not definitely determined in any.
	enumeration	6	A feature's position has been obtained from questionable or unreliable data.

	enumeration	7	An object whose position has been reported and its position confirmed by some means other than a formal survey such as an independent report of the same object.
	enumeration	8	An object whose position has been reported and its position has not been confirmed.
	enumeration	9	The most probable position of an object determined from incomplete data or data of questionable accuracy.
	enumeration	10	A position that is of a known value, such as the position of an anchor berth or other defined object.
	enumeration	11	A position that is computed from data.

Facets	enumeration	1	The average height of the low waters of spring tides. This level is used as a tidal datum in some areas. Also called spring low water.
	enumeration	2	The average height of lower low water springs at a place.
	enumeration	3	The average height of the surface of the sea at a tide station for all stages of the tide over a 19-year period, usually determined from hourly height readings measured from a fixed predetermined reference level.
	enumeration	4	An arbitrary level conforming to the lowest tide observed at a place, or some what lower.
	enumeration	5	The average height of all low waters at a place over a 19-year period.
	enumeration	6	An arbitrary level conforming to the lowest water level observed at a place at spring tides during a period of time shorter than 19 years.
	enumeration	7	An arbitrary level, usually within 0.3m from that of Mean Low Water Springs (MLWS).
	enumeration	8	An arbitrary tidal datum approximating the level of the mean of the lower low water at spring tides. It was first used in waters surrounding India.
	enumeration	9	An arbitrary level, approximating that of mean low water springs (MLWS).
	enumeration	10	An arbitrary level, usually within 0.3m from that of Lowest Astronomical Tide (LAT).
	enumeration	11	An arbitrary level approximating the lowest water level observed at a place, usually equivalent to the Indian Spring Low Water (ISLW).
	enumeration	12	The average height of the lower low waters at a place over a 19-year period.
	enumeration	13	The lowest level reached at a place by the water surface in one oscillation. Also called low tide.
	enumeration	14	An arbitrary level, usually within 0.3m from that of Mean Low Water (MLW).
	enumeration	15	An arbitrary level, usually within 0.3m from that of Mean Lower Low Water (MLLW).
	enumeration	16	The average height of all high waters at a place over a 19-year period.
	enumeration	17	The average height of the high waters of spring tides. Also called spring high water.

	enumeration	18	The highest level reached at a place by the water surface in one oscillation.
	enumeration	19	An arbitrary level, usually within 0.3m from that of Mean Sea Level (MSL).
	enumeration	20	An arbitrary level, approximating that of mean high water springs (MHWS).
	enumeration	21	The average height of higher high waters at a place over a 19-year period.
	enumeration	22	The level of low water springs near the time of an equinox.
	enumeration	23	The lowest tide level which can be predicted to occur under average meteorological conditions and under any combination of astronomical conditions.
	enumeration	24	An arbitrary datum defined by a local harbour authority, from which levels and tidal heights are measured by this authority.
	enumeration	25	A vertical reference system with its zero based on the mean water level at Rimouski/Pointe-au-Pere, Quebec, over the period 1970 to 1988.
	enumeration	26	The average of all hourly water levels over the available period of record.
	enumeration	27	The average of the lowest low waters, one from each of 19 years of observations.
	enumeration	28	The average of the highest high waters, one from each of 19 years of observations.
	enumeration	29	An arbitrary level approximating the highest water level observed at a place, usually equivalent to the high water springs.
	enumeration	30	The highest tidal level which can be predicted to occur under average meteorological conditions and under any combination of astronomical conditions.
	enumeration	44	The datum refers to each Baltic country's realization of the European Vertical Reference System (EVRS) with land-uplift epoch 2000, which is connected to the Normaal Amsterdams Peil (NAP).

	enumeration	20	An arbitrary level, approximating that of mean high water springs (MHWS).

	enumeration	21	The average height of higher high waters at a place over a 19-year period.
	enumeration	24	An arbitrary datum defined by a local harbour authority, from which levels and tidal heights are measured by this authority.
	enumeration	25	A vertical reference system with its zero based on the mean water level at Rimouski/Pointe-au-Pere, Quebec, over the period 1970 to 1988.
	enumeration	26	The average of all hourly water levels over the available period of record.
	enumeration	28	The average of the highest high waters, one from each of 19 years of observations.
	enumeration	29	An arbitrary level approximating the highest water level observed at a place, usually equivalent to the high water springs.
	enumeration	30	The highest tidal level which can be predicted to occur under average meteorological conditions and under any combination of astronomical conditions.
	enumeration	44	The datum refers to each Baltic country's realization of the European Vertical Reference System (EVRS) with land-uplift epoch 2000, which is connected to the Normaal Amsterdams Peil (NAP).

Namespace	No namespace		
Type	vesselsCharacteristicsCode		
Properties	use:	required	
Facets	enumeration	1	The maximum length of the ship.
	enumeration	2	The ship's length measured at the waterline.
	enumeration	3	The width or beam of the vessel.
	enumeration	4	The depth of water necessary to float a vessel fully loaded.
	enumeration	6	A measurement of the weight of the vessel, usually used for warships. (Merchant ships are usually measured based on the volume of cargo space; see tonnage). Displacement is expressed either in long tons of 2,240 pounds or metric tonnes of 1,000 kg. Since the two units are very close in size (2,240 pounds = 1,016 kg and 1,000 kg = 2,205 pounds), it is common not to distinguish between them. To preserve secrecy, nations sometimes misstate a warship's displacement.
	enumeration	7	The weight of the ship excluding cargo, fuel, ballast, stores, passengers, and crew, but with water in the boilers to steaming level.
	enumeration	8	The weight of the ship including cargo, passengers, fuel, water, stores, dunnage and such other items necessary for use on a voyage, which brings the vessel down to her load draft.
	enumeration	9	The difference between displacement, light and displacement, loaded. A measure of the ship's total carrying capacity.
	enumeration	10	The entire internal cubic capacity of the ship expressed in tons of 100 cubic feet to the ton, except certain spaces with are exempted such as: peak and other tanks for water ballast, open forecastle bridge and poop, access of hatchways, certain light and air spaces, domes of skylights, condenser, anchor gear, steering gear, wheel house, galley and cabin for passengers.
	enumeration	11	Obtained from the gross tonnage by deducting crew and navigating spaces and allowances for propulsion machinery.

	enumeration	12	The Panama Canal/Universal Measurement System (PC/UMS) is based on net tonnage, modified for Panama Canal purposes. PC/UMS is based on a mathematical formula to calculate a vessel's total volume; a PC/UMS net ton is equivalent to 100 cubic feet of capacity.
	enumeration	13	The Suez Canal Net Tonnage (SCNT) is derived with a number of modifications from the former net register tonnage of the Moorsom System and was established by the International Commission of Constantinople in its Protocol of 18 December 1873. It is still in use, as amended by the Rules of Navigation of the Suez Canal Authority, and is registered in the Suez Canal Tonnage Certificate.

Attribute `vesselsCharacteristicsUnitType / @code`

Namespace	No namespace		
Type	vesselsCharacteristicsUnitCode		
Properties	use:	`required`	
Facets	enumeration	`1`	The basic unit of length in the International System of Units (SI) system.
	enumeration	`3`	The tonne or metric ton (U.S.), often redundantly referred to as a metric tonne, is a unit of mass equal to 1,000 kg (2,205 lb) or approximately the mass of one cubic metre of water at four degrees Celsius. It is sometimes abbreviated as mt in the United States, but this conflicts with other SI symbols. The tonne is not a unit in the International System of Units (SI), but is accepted for use with the SI. In SI units and prefixes, the tonne is a megagram (Mg). The Imperial and US customary units comparable to the tonne are both spelled ton in English, though they differ in mass. Pronunciation of tonne (the word used in the UK) and ton is usually identical, but is not too confusing unless accuracy is important as the tonne and UK long ton differ by only 1.6.
	enumeration	`4`	Long ton (weight ton or imperial ton) is the name for the unit called the "ton" in the avoirdupois or Imperial system of measurements, as used in the United Kingdom and several other Commonwealth countries. It has been mostly replaced by the tonne, and in the United States by the short ton. One long ton is equal to 2,240 pounds (1,016 kg) or 35 cubic feet (0.9911 m) of salt water with a density of 64 lb/ft (1.025 g/ml). It has some limited use in the United States, most commonly in measuring the displacement of ships, and was the unit prescribed for warships by the Washington Naval Treaty for example battleships were limited to a mass of 35,000 long tons (36,000 t; 39,000 ST).
	enumeration	`5`	A unit of weight equal to 2,000 pounds (907.18474 kg). In the United States it is often called simply ton without distinguishing it from the metric ton (tonne, 1,000 kilograms) or the long ton (2,240 pounds / 1,016.0469088 kilograms); rather, the other two are specifically noted. There are, however, some US applications for which unspecified tons normally means long tons (for example, Navy ships) or metric tons (world grain production figures). Both the long and short ton are defined as 20 hundredweights, but a hundredweight is 100 pounds (45.359237 kg) in the US system (short or net hundredweight) and 112 pounds (50.80234544 kg) in the Imperial system (long or gross hundredweight).
	enumeration	`6`	Gross tonnage (GT) is a function of the volume of all ship's enclosed spaces (from keel to funnel) measured to the outside of the hull framing. There is a sliding scale factor. So GT is a kind of capacity-derived index that is used to rank a ship for purposes of determining manning, safety and other statutory requirements and is expressed simply as GT, which is a unitless entity, even though its derivation is tied to the cubic meter unit of volumetric capacity.Tonnage measurements are now governed by an IMO Convention (International Convention on Tonnage Measurement of Ships, 1969 (London-Rules)), which applies to all ships built after July 1982. In accordance with the Convention, the correct term to use now is GT, which is a

			function of the moulded volume of all enclosed spaces of the ship.
	enumeration	7	Net tonnage (NT) is based on a calculation of the volume of all cargo spaces of the ship. It indicates a vessels earning space and is a function of the moulded volume of all cargo spaces of the ship.
	enumeration	9	The Suez Canal Net Tonnage (SCNT) is derived with a number of modifications from the former net register tonnage of the Moorsom System and was established by the International Commission of Constantinople in its Protocol of 18 December 1873. It is still in use, as amended by the Rules of Navigation of the Suez Canal Authority, and is registered in the Suez Canal Tonnage Certificate.

	enumeration	7	A vessel designed to carry refrigerated cargo.
	enumeration	8	A vessel that is used and equipped for the fishing of living aquatic resources.
	enumeration	9	A vessel which provides a service such as a tug, anchor handler, survey or supply vessel.
	enumeration	10	A vessel designed for the conduct of military operations.
	enumeration	11	Either a tug and tow, or any combination of a tug providing propulsion to barges or vessels secured ahead or alongside.
	enumeration	12	A combination of tug(s) and non-powered tow(s).
	enumeration	13	A pleasure boat or watercraft, or an excursion vessel used for short cruises such as whale watching.
	enumeration	14	An installation which is designed to float at all times and which is normally anchored in position when deployed in the offshore gas and oil industry.
	enumeration	15	An exploration or project installation with legs which can be raised and lowered. The legs are raised when the installation is re-positioned. When stationary the legs are lowered to the sea floor and the working platform is raised clear of the sea surface.
	enumeration	16	A vessel designed to carry large quantities of live animals.
	enumeration	17	A vessel used in fishing for pleasure or competition.

Attribute `transportConnectionType / @code`

Namespace	No namespace		
Type	transportConnectionCode		
Properties	use:	optional	
Facets	enumeration	2	A small airport for the use of helicopters and some other vertical lift aircraft. Heliports typically contain one or more touchdown and liftoff areas and also have facilities such as fuel or hangars. In some larger towns and cities, customs facilities may also be available.
	enumeration	3	A small landing surface for helicopters, with minimal or no supporting installations or facilities.
	enumeration	4	Small boat with crew that may be hired for single journeys.
	enumeration	5	A building where buses and coaches regularly stop to take on and/or let off passengers, especially for long-distance travel.
	enumeration	6	A vessel for transporting passengers, vehicles, and/or goods across a stretch of water, especially as a regular service.
	enumeration	8	A limited access dual carriageway road specially designed for fast long-distance traffic and subject to special regulations concerning its use. It may have more than two lanes.
	enumeration	9	Large open or half decked boat.
	enumeration	11	The carriage of goods or passengers using navigable waterways such as canals, rivers, lakes, or other stretch of water that is not part of the sea.
	enumeration	12	The carriage of specified types of cargo between qualifying ports. The types of cargo and/or qualifying ports are generally specified by law or government regulation.
	enumeration	13	Specially designated commercially navigable routes in coastal, inland, and intracoastal waters, frequently as waterborne relievers to congested landside routes.
